Thanks, I was hoping that you had a good working relationship with DOE and could assist in helping us secure the permit.

Mark

I spoke with Rick and the issue here seems to be with storm water runoff and not the industrial wastewater from the truck washing operation. Rick explained that your trucks are washed on a pad that drains to the sanitary sewer through an oil/water separator. This is fine and does not require a permit from Industrial Waste. It seems you only need to apply to Ecology for a general storm water discharge permit which all tenants of the Airport are required to have. Please call if you have any questions.
